# Day in the Life: Transport and Logistics

Zebra for Android devices help your people achieve new efficiencies out in the field, whether they're delivering, selling, inspecting, monitoring, repairing or servicing.

ZEBRA

1

FASTER DELIVERIES

Dan has a tight delivery schedule that would be impossible without his Zebra for Android TC56 and the Mobility DNA SimulScan application. This allows him to scan delivery documents quickly and accurately – capturing multiple barcodes, images, check boxes and lines of text in just one scan. His in and out times have improved dramatically.

2

DATA ACCESS SAVES MONEY

As a technician using a Zebra for Android ET55, John can see on a large screen, over 4G LTE or Wi-Fi, all the back-end system information he needs in the field. This eliminates many repeat visits and enables him to phone subsequent customers with arrival windows.

3

ONE DEVICE FOR EVERYTHING

Sarah uses her Zebra for Android TC75 handheld for GPS route finding, scanning labels and logging sales. It also has the advanced Workforce Connect app, so she can communicate with base along the way – via text or handsfree 2-way voice communications.

LARGE 5" HD display

GORILLA® GLASS with tougher drop spec

SLEEK LOOK and design

FAST AND EASY SCANNING with unique Active Edge and central back buttons

APPS   WIDGETS
AppGallery   Battery Swap   Bluetooth Pairing Utility   Browser
Calculator   Calendar   Camera   Clock
DataAnalytics   DataWedge   Downloads   DWDemo
Swipe Assist   Email   File Browser   Gallery

USER REPLACEABLE BATTERY with simple latch design

SEAMLESS ROAMING with best-in-class Wi-Fi

Day in the Life: Transport and Logistics

Zebra for Android devices help your people achieve new efficiencies out in the field, whether they're delivering, selling, inspecting, monitoring, repairing or servicing.

ZEBRA

4
EASY TO USE FROM DAY ONE

It's Tom's first day, but he can use his Zebra for Android ET55 device right away, with minimal training at handover. Its familiar Android interface is simple and intuitive to use. He won't need to ask for help.

5
BUILT FOR A DEMANDING ENVIRONMENT

Sarah drops her TC75 on a hard concrete floor. It's okay, though. Its rugged case is built to withstand long drops, knocks, dust and water in toughest of outdoor environments.

6
EXTRA SECURITY ON THE ROAD

Sarah makes a sale and takes a credit card payment. Zebra has injected an extra layer of security into Android, so all Zebra for Android devices are secure enough to handle and transmit sensitive data.

7
TEAMWORK MADE EASY

Back at base, it's easy to track and co-ordinate field workers using GPS and the Workforce Connect app. This offers an advanced range of options, including group messaging via voice or text.

CORNING® GORILLA® GLASS touch screen and scanner window

RUTHLESSLY drop and tumble tested

FAST, VERSATILE barcode capture

DUAL MODE INPUT – manual, or stylus

TOUGH, INDUSTRIAL-GRADE connectors

IP67 SEALING against spillages and immersions

OUTSTANDING AUDIO CLARITY
